

ENVIRONMENTAL POLICY

Mi Electric is committed to enhancing the performance of our Environmental Management System. Mi Electric has implemented an Environmental Management System which meets the requirements of ISO 14001:2015. Through our activities we will achieve a balance between the environment, society and the economy without compromising the ability of future generations to meet their needs.

Our Commitment

- Provide the resources necessary to conduct business and operations in compliance with applicable environmental laws, regulation and standards including but not limited to the Environmental Protection Act 1994 (QLD) and Environmental Protection Regulation 2008 (QLD).
- To protect the Environment, including the prevention of pollution.
- Ensuring that the business understands its Environmental impact and sets measurable objectives and targets to evaluate our environmental performance.
- Ensuring that the impact of our business activities are understood, and that our related Environmental Impacts are understood with measurable objectives and targets.
- Hold management at all levels responsible for the environmental compliance of activities under their control.
- Encourage all business operations to conduct their activities in a manner that minimises their environmental impact.
- Ensure that company employees are provided with suitable operating procedures and training.
- Continually improve our systems and environmental performance by maintaining an Environmental Management System.
- Communicate this commitment to employees and ensure environmental protection remains a priority.

Your Commitment

- Take personal responsibility and complete work in a way that minimises environmental impact.
- Report all incidents and conditions likely to negatively impact the environment.
- Comply with all company and regulatory requirements that aim to prevent environmental impact.

Mi Environment. Mi Responsibility. Mi World.
